TECHNOLOGIES

ABOUT ME

I am a passionate Systems Engineer and Web Developer Front-End from Florencia, Caquetá - Colombia. I really enjoy learning new things. I am proactive, organized, responsible and an excellent team partner. I have experience developing web applications with React | Remix | ViteJS | NextJS | JavaScript | HTML | CSS3 | Strapi | MySQL integrating CSS frameworks such as TailwindCSS and Bootstrap and User Interface libraries (UI) for React as Next-UI and Material-UI. Likewise, I am learning NodeJS. I am currently studying English and my level is (B1). As a Front-End Web Developer, I am eager to continue learning other technologies to enhance my knowledge and professional skills.

ACADEMIC FORMATION

UNIVERSITY OF AMAZONIA

Systems Engineer

2012 – 2019

PROJECTS

Vet APP. (13/06/2023).

Personal project using ReactJS and TailwindCSS where you can CREATE, READ, UPDATE and DELETE a patient.

<https://veterinariapets.netlify.app/>

Cost Planner . (23/07/2023).

Personal project using ReactJS and Bootstrap where you can input an initial value and some expense values, performing calculations for the remaining amount and the sum of expenses. <https://gastosplanificador.netlify.app/>

PokeAPI . (31/05/2023).

A project using the Pokemon API, where you randomly get a new Pokemon by throwing the Pokeball.

<https://playpokeapi.netlify.app/>

Extra Hours . (26/12/2023).

Extra Hours is a project designed to calculate the hours worked by employees of a company, allowing for the calculation of their value.
